

Tuff Core[®] Compression

Onsrud Cutter's Tuff Core[®] is an innovative line of solid carbide compression spirals that utilize unique dual grade carbide. The harder outer shell is reinforced with a tough inner core which makes the tool stronger and reduces breakage.

Inner Core

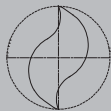

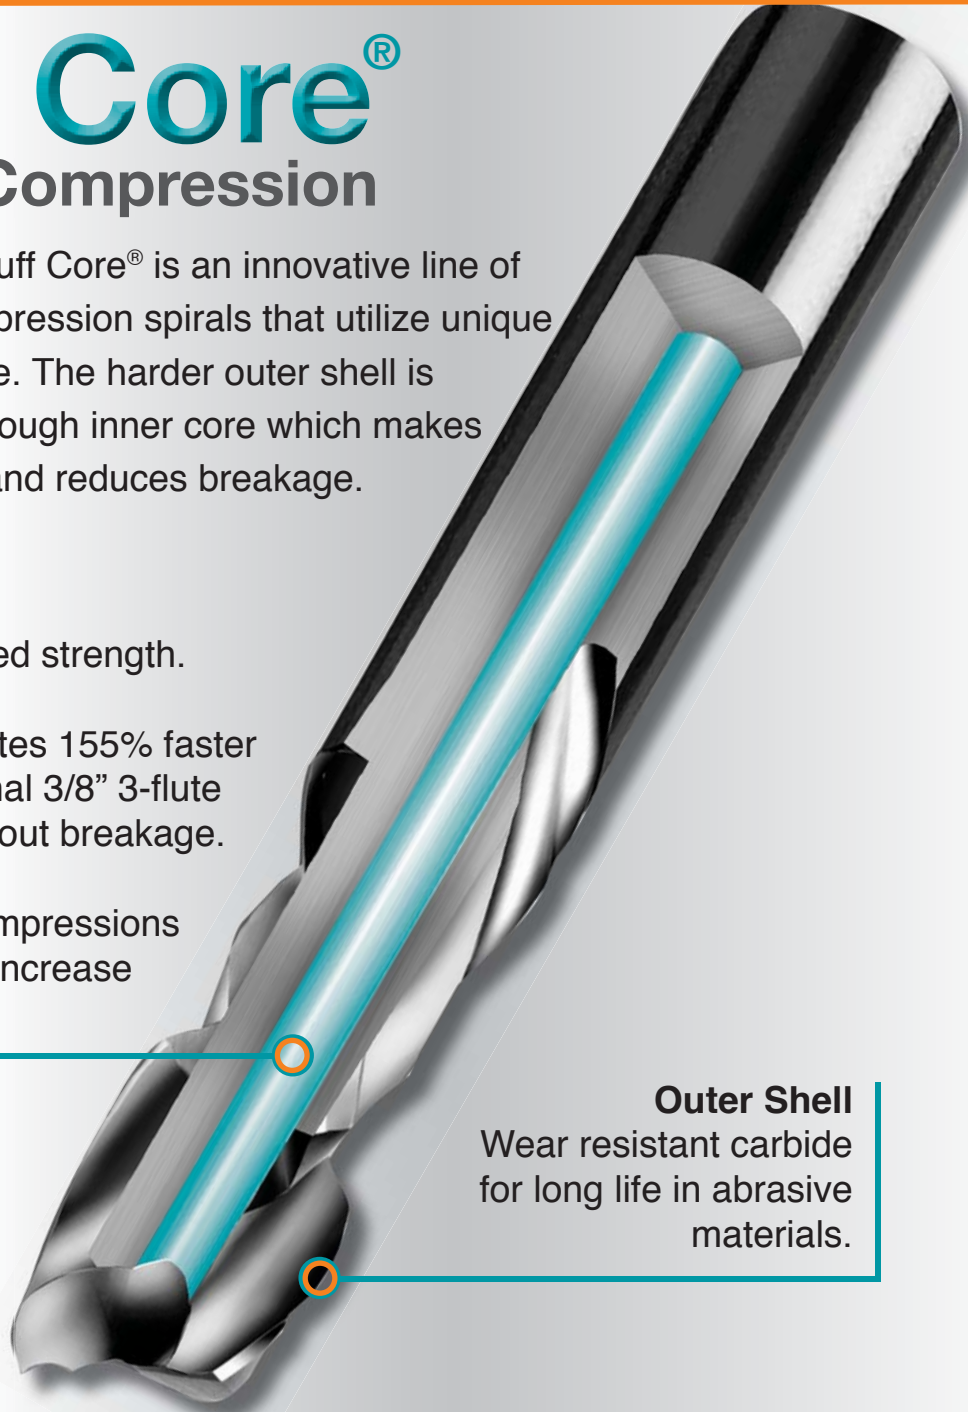

Tuff Core for added strength.

Allows for feed rates 155% faster than a conventional 3/8" 3-flute compression without breakage.

Replaces 1/2" compressions with 3/8" tools to increase yield.

Outer Shell

Wear resistant carbide for long life in abrasive materials.
